# BACKYARD IDEA BOOK

OUTDOOR KITCHENS • SHEDS & STORAGE

FIREPLACES • PLAY SPACES • POOLS & SPAS

LEE ANNE WHITE

« **BUILT-IN SEATING** can be installed along the outside edge of a deck or placed against the house, as shown here. Built-in benches provide casual seating and can help accommodate a crowd when entertaining.

« **DECKS SUIT HOUSES** on steep hillsides. This one has a deck that wraps around the house, extends toward the edge of the property, and then cascades down steps to a stone patio and small lawn. The configuration makes the yard more accessible and inviting.

« **STAINLESS-STEEL CABLE PORCH RAILINGS** complement the contemporary architecture of this beach house. The cable is noncorrosive and may be attached to wood, carbon-steel pipe, structural tubing, or stainless-steel posts.
